Less: Unallocated Operating Expenses					-90,000
Net Profit					480,000

## Important Notes

- This statement breaks down income and expenses by department for better performance analysis.
- Gross profit is calculated as Revenue minus Cost of Goods Sold, per department.
- Departmental profit represents gross profit less direct operating expenses of each department.
- Unallocated expenses (e.g., head office costs) are deducted at the end to determine net profit.
- Accurate departmental allocation is essential for informed management decisions.
