Total Estimated Value					2,018.00	

Assessment and Recommendations

The reported losses for the period primarily involve theft, misplaced goods, and damage attributable to transit issues. Security checks should be intensified, and staff training on inventory handling must be reinforced. Regular inventory counts and tighter access controls are recommended.

Important Notes:

- This report documents inventory discrepancies for the referenced period and location only.
- Further investigation may be required to pinpoint causes and prevent recurrence.
- Loss valuations are based on latest available purchase price and may not represent replacement costs.
- All incidents of inventory loss should be reported promptly and accurately for compliance purposes.
- This document may be used for insurance or audit review; ensure accuracy before filing.
