Subtotal						700.00
VAT (21%)						147.00
Total						847.00 EUR

Important Notes about ODC Documents

- OpenDocument Chart (ODC) is part of the OpenDocument family, used for representing complex structured data in charts and tables.
- An ODC invoice visualization renders structured invoice data from an ODC file into a human-readable format.
- While ODC stores data and relationships, visual elements such as tables and labels are created by an application that interprets the ODC file structure.
- ODC documents help to ensure invoice data is both machine-processable and suitable for digital exchange and archiving.
- Always verify the validity and integrity of ODC invoice documents before processing or payment.
