

# Challenges & Solutions Progress Summary

## Project/Team:

Acme App Revamp - Frontend Team

## Reporting Period:

May 2024

## Current Challenges & Solution Progress

Challenge	Solution / Action Plan	Owner	Status
API latency increases during peak hours	Optimized database queries and added caching layer	Dev Team	Completed
UI inconsistencies across browsers	Adopted cross-browser testing using BrowserStack	QA Team	In Progress
Delayed client feedback on design mockups	Set weekly design review calls with client	UX Lead	Ongoing
Debugging slow build times in CI/CD pipeline	Investigating dependency caching and parallel jobs	DevOps	Pending

## Progress Highlights

- Major latency issue resolved, improving page load times by 40%.
- Weekly reviews established, resulting in faster design approvals.
- Cross-browser QA coverage expanded to 6 target browsers.

## Important Notes

- Keep challenge descriptions concise and specific for clarity.
- Status updates should reflect recent progress or blockers.
- Update solution/action plans regularly as situations evolve.
- Encourage team ownership by clearly assigning responsibilities.
- Use as a reference in review meetings to track resolution trends.
