May	\$440,000
June	\$480,000
July	\$500,000
August	\$520,000
September	\$480,000
October	\$550,000
November	\$580,000
December	\$570,000

Assumptions & Methodology

- Projections are based on prior 3-year performance averages adjusted for anticipated growth rates.

- No major economic or industry disruptions are assumed.
- New product launch planned in Q3 is forecasted to increase Q4 sales by 13%.
- Churn rate for SaaS subscriptions estimated at 4% monthly.

Important Notes

- Revenue projections are estimates based on available information at the time of report preparation.
- Assumptions used should be revisited regularly to ensure continued accuracy.
- Actual results may vary significantly due to market or internal factors.
- This report should be used in conjunction with ongoing financial monitoring.
