| <b>Total</b>           | <b>142,000</b>       | <b>144,200</b>     | <b>+2,200</b> | <b>+1.5%</b> |   |

### Important Notes

- Variance analysis helps identify deviations between budgeted and actual figures for timely corrective actions.
- Positive variance indicates overspending; negative variance indicates savings or underspending.
- All significant variances should be explained in the remarks column.
- This report aids in better resource planning and improves budget accuracy in subsequent periods.
- Regular review enhances departmental accountability and financial discipline.
