

# Data Source Limitation Document

## 1. Document Details

Document Title	Data Source Limitation Document
Version	1.0
Date	2024-06-07
Prepared By	John Doe

## 2. Purpose

This document outlines the limitations and constraints of the data sources used in the [Project Name/Report Title]. Understanding these limitations is essential for correct interpretation of analysis and findings derived from the data.

## 3. Data Source Overview

Data Source	Description	Period Covered
Source A	National Survey Results	2022-2023
Source B	Governmental Database	2019-2023
Source C	Proprietary Transaction Data	2021-2023

## 4. Identified Limitations

- Coverage Limitations:** Some datasets exclude specific demographics or geographical regions, potentially affecting representativeness.
- Timeliness:** There may be a lag between the data collection period and the latest available data.
- Data Completeness:** Missing values and incomplete records exist in several data sources.
- Data Accuracy:** Data collected via self-reporting mechanisms may be prone to bias or errors.
- Access and Availability:** Some sources are not publicly available, limiting transparency.

## 5. Mitigation Strategies

- Clearly state assumptions and limitations in any derived analysis.
- Where possible, corroborate findings using multiple data sources.
- Apply statistical techniques to handle missing or incomplete data.
- Maintain documentation and version control for all data used.

## 6. Important Notes

- Data Source Limitation Documents are essential for maintaining transparency and credibility in reporting.
- They help stakeholders understand the constraints and reliability of findings.
- This document should be reviewed and updated regularly as data sources or project requirements change.
- Such documents do not provide solutions to limitations but inform users of their existence.
