   A hardware or software component that stores data to serve future requests more quickly.

5. **Term 5: Deployment**
   The process of releasing and installing a software application for use.

- Numbered glossary lists help readers quickly locate and reference specific terms.
- Each entry includes a term followed by its clear and concise definition.
- This format is useful for educational, technical, or reference documents.
- Terms should be listed in a consistent order, often alphabetically or by relevance.
