Flowchart Document Sample
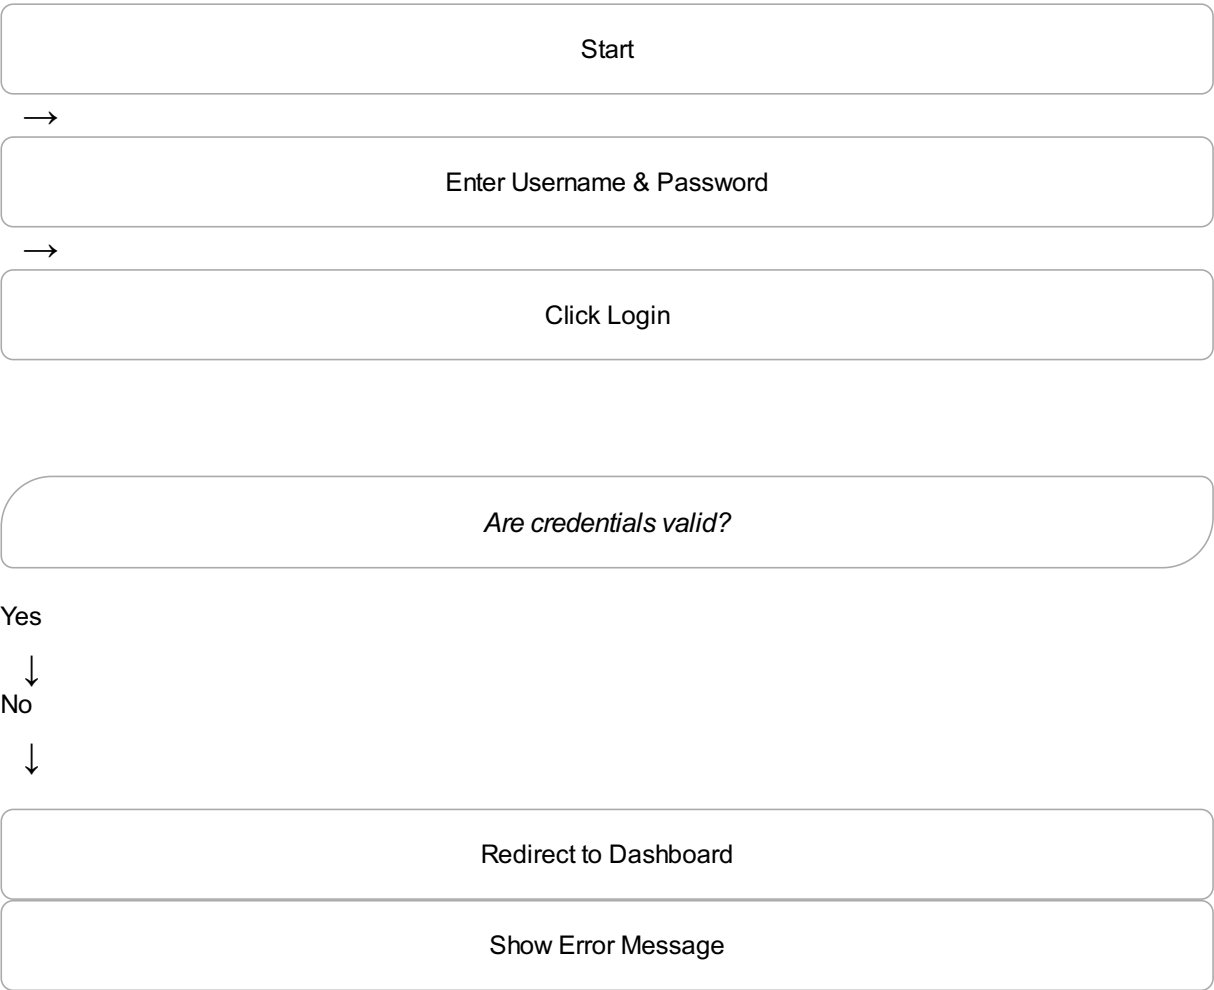

Document Title: User Login Process Flowchart

Version: 1.0
Date: 2024-06-26
Prepared by: Flowchart Doc Team

1. Objective

To visually represent the process a user follows to log into the system, including validation, decision points, and possible outcomes.

2. Flowchart Diagram

Start

→

Enter Username & Password

→

Click Login

Are credentials valid?

Yes

↓

No

↓

Redirect to Dashboard

Show Error Message

3. Process Description

1. User enters their username and password on the login form.
2. Upon clicking **Login**, the system checks if the entered credentials are valid.
3. If the credentials are correct, the user is redirected to their dashboard.
4. If the credentials are incorrect, an error message is displayed and user is prompted to try again.

Version	Date	Description

Important Notes

- Flowchart documents simplify complex processes into intuitive diagrams.
- Ensure each step and decision point is clearly labeled for easy understanding.
- Keep flowcharts updated to reflect process or requirement changes.
- Flowcharts are useful for onboarding, troubleshooting, and process optimization.
- Use standard symbols and consistency for cross-team comprehension.
