

# Integrative Literature Review Report

## 1. Introduction

Briefly introduce the topic of interest. State the purpose and significance of the integrative literature review. Outline the scope, main themes and objectives guiding the review.

## 2. Methodology

### 2.1 Search Strategy

Describe the databases and sources used, the keywords, and the time frame for literature selection.

### 2.2 Inclusion and Exclusion Criteria

Explain criteria for including or excluding studies (e.g., language, publication date, study design).

### 2.3 Data Extraction and Synthesis

Outline how data were extracted from selected studies and the approach for synthesis.

## 3. Thematic Findings

### 3.1 Theme 1: [Theme Title]

Summarize and synthesize key findings from the literature related to the first theme. Compare and contrast key studies.

### 3.2 Theme 2: [Theme Title]

Discuss the second major theme and provide integrative analysis of relevant sources.

### 3.3 Theme 3: [Theme Title]

Continue as needed to address additional themes that emerge from the literature.

## 4. Discussion

Interpret and evaluate the findings in relation to the objectives. Discuss implications, strengths, and gaps in the literature. Address limitations of the review process.

## 5. Conclusion

Provide a concise summary of the integrative insights and their relevance. Suggest recommendations for future research or practice.

## 6. References

1. Author(s). (Year). Title of article. *Journal Name*, volume(issue), pages.
2. Author(s). (Year). Title of book. Publisher.

### **Important Notes on Integrative Literature Review Reports:**

- Combines findings from diverse methodologies (theoretical, empirical, qualitative, quantitative).
- Emphasizes synthesis and integration, not just summary of individual studies.
- Helps identify gaps, emerging trends, and directions for future research.
- Requires rigorous documentation of search and selection process.
- Demands critical analysis and interpretation of findings within a coherent structure.
