

Systematic Literature Review

Document Title: [Insert Title Here]

Authors: [Author Name(s)]

Date: [Insert Date]

1. Introduction

Briefly introduce the background and significance of the research topic. State the purpose and objectives of this systematic literature review.

2. Research Questions

- Main research question 1
- Main research question 2

3. Methodology

3.1 Search Strategy

Describe databases searched, time period covered, and keywords used.

3.2 Inclusion & Exclusion Criteria

Define clear criteria for including or excluding studies.

3.3 Data Extraction

Explain the process for extracting relevant data from each study.

3.4 Quality Assessment

Summarize how the quality of the studies was assessed.

4. Results

4.1 Study Selection

Indicate the number of studies identified, screened, included, and excluded.

4.2 Characteristics of Included Studies

Provide an overview of the key characteristics of the included studies.

4.3 Synthesis of Findings

Summarize main findings in relation to each research question.

5. Discussion

Interpret the main findings, discuss strengths and limitations, and relate to existing knowledge.

6. Conclusion

Summarize the main conclusions of the review and implications for research, practice, or policy.

7. References

- [1] Author, A. (Year). Title of the study. *Journal Name*, Volume(Issue), pages.
- [2] Author, B. (Year). Title of another study. *Journal Name*, Volume(Issue), pages.

Important Notes about Systematic Literature Reviews:

- Systematic reviews follow a structured and transparent methodology to minimize bias.
- Clear inclusion and exclusion criteria are essential for reproducibility.
- Documentation of search strategies and data extraction methods is crucial.
- Critical assessment of the quality of studies enhances the reliability of findings.
- This type of review is especially valuable for identifying research gaps and informing decision-making.
