

Radar Chart Document Format Example

1. Overview

This document presents a sample Radar Chart format for evaluating and visualizing the performance of different criteria. Radar Charts (also known as Spider Charts) are useful for comparative analysis and multi-dimensional assessments.

2. Data Table

Criteria	Score (Out of 10)
Communication	8
Teamwork	7
Problem Solving	9
Adaptability	6
Productivity	8

3. Radar Chart Visualization

4. Interpretation Summary

The radar chart visually highlights strengths in Problem Solving and balanced scores in other key criteria. Teams or individuals can use this chart to quickly identify areas of focus and comparative strengths for further development.

5. Important Notes

- Radar charts are most effective with 3â€“8 variables for clear readability.
- All scores should be on a uniform scale for meaningful comparison.
- This format is best suited for skill assessment, performance review, and survey analysis.

- Ensure criteria are clearly defined to avoid ambiguity in assessment.
- Visual interpretation should be supplemented with supporting analysis.
