

# Energy Usage and Efficiency Data Table

## Summary Table

Location/Unit	Energy Source	Consumption (kWh)	Consumption Period	Efficiency (%)	Notes
Main Office	Electricity	12,340	Jan - Mar 2024	85	Includes lighting and HVAC
Manufacturing Area 1	Gas	8,920	Jan - Mar 2024	78	Boiler operation
Warehouse	Electricity	3,210	Jan - Mar 2024	92	LED upgrades completed Jan 2024
R&D Lab	Electricity	4,800	Jan - Mar 2024	80	Includes specialized equipment
Administration	Electricity	1,450	Jan - Mar 2024	88	Low occupancy

## Important Notes

- Ensure all consumption data is measured over the same period for accurate comparison.
- Efficiency percentages should be calculated based on relevant benchmarks or equipment specifications.
- Notes should include any changes or upgrades affecting energy use or efficiency.
- Review periodically to track trends and identify areas for improvement.
- Source data should be transparent and verifiable for audit purposes.
