## Summary & Highlights

The week will begin with clear and sunny conditions, trending hotter toward the weekend. There is a small risk of showers late Sunday, with unsettled weather and higher rain probability on Monday. Conditions are expected to clear up by Tuesday, with a return to seasonable temperatures.

- Highest temperature expected: 32°C (Saturday)
- Best days for outdoor activities: Wednesday to Saturday
- Monitor Monday for weather impacts and potential schedule changes
- Stay hydrated and use sun protection during high UV days

## Important Notes on Extended Weeklong Event Weather Summaries

- Forecasts beyond 3–4 days have increased uncertainty; check for daily updates.
- Include specific impact notes (e.g., heat, wind, storms) for event planning.
- Clearly indicate any high-probability weather risks or changes.
- Use consistent formatting for readability and quick reference.
- Monitor official sources for severe weather alerts during the week.
