Data Format Example (JSON)

```json
{
  "title": "Rain Alert",
  "message": "Light rain expected in your area at 2:00 PM. Don't forget your umbrella!",
  "icon": "☐☐",
  "timestamp": "2024-06-22T13:50:00Z",
  "type": "weather_alert",
  "location": "Berlin, DE"
}
```

Important Notes

- Notifications should be concise and actionable.
- Include time, type, and severity of weather event.
- Personalize messages with user's location when possible.
- Use clear icons to indicate event type for quick identification.
- Timestamp and source (app name) should be displayed.
- Always test notification formatting on real mobile devices.
