

# Daily Weather Forecast Synopsis

## Date:

June 25, 2024

## Issued By:

National Meteorological Center

## Time of Issue:

07:00 AM Local Time

## General Weather Synopsis

The region is currently under the influence of a mild southwest monsoon. Scattered showers and isolated thunderstorms are expected mainly in the afternoon and evening. Temperatures will remain near average for this time of year with moderate humidity levels. Winds are expected to be light to moderate, predominantly from the southwest.

## Forecast Summary Table

Region	Weather	Min Temp (°C)	Max Temp (°C)	Wind
North Coast	Scattered showers, cloudy intervals	19	27	SW 10-15 km/h
Central Plains	Isolated thunderstorms	21	29	SW 10 km/h
Southern Highlands	Partly cloudy, light showers late	16	25	WSW 8 km/h

## Outlook for the Next 24 Hours

Rainfall is expected to be heaviest in coastal and mountainous areas during the late afternoon. Temperatures will gradually fall overnight. Winds are forecasted to strengthen slightly in open areas tomorrow morning.

## Important Notes

- This document provides a summary and should be supplemented with detailed local forecasts where available.
- Rapid weather changes are possible; monitor for updates throughout the day.
- Pay close attention to official weather warnings and advisories.
- Use this synopsis for informational purposes; critical decisions should reference full meteorological bulletins.
- Forecasts may be revised as new data becomes available.
