

Regional Weather Warning Notice

Issued by [Regional Meteorological Office]

Document No.:	RW-2024-045
Date/Time Issued:	2024-06-22 14:00 (Local Time)
Validity:	2024-06-22 14:00 to 2024-06-24 08:00
Area(s) Affected:	North River Valley, East Central Plains, Lake District
Type of Warning:	Severe Thunderstorm & Heavy Rainfall
Probability:	High

Summary

Persistent weather patterns are expected to produce severe thunderstorms with locally heavy rainfall across the specified regions. Rainfall accumulation may exceed 100mm in some locations, with strong wind gusts of up to 70 km/h.

Detailed Information

- Thunderstorms:** Frequent lightning; isolated hail possible.
- Rainfall:** Heavy showers may cause flash flooding in low-lying areas.
- Winds:** Gusts up to 70 km/h may cause temporary disruptions and tree damage.
- Recommended Actions:** Stay tuned for updates. Avoid exposed and flood-prone areas. Secure loose objects outdoors.

Important Notes:

- Weather warnings are issued to notify authorities and the public of potential severe weather risks.
- Always refer to the latest updates during the validity period as conditions may change rapidly.
- This document should be disseminated promptly to all relevant agencies and stakeholders.
- Follow official advice and safety instructions during warning periods.
