Important Notes:

- The rolling 12-month forecast is updated monthly to incorporate latest actual sales data and new business insights.
- Variance column highlights differences between projected and actual sales, useful for identifying trends or anomalies.
- Forecast assumptions should be regularly reviewed and aligned with current market trends for improved accuracy.
- This report is intended for sales planning, budgeting, and resource allocation purposes only.
- Use this document as a living tool – adjust promptly in response to significant business or market changes.
