

Product-Level Inventory Forecast Document

Document Overview

This document presents the projected inventory levels for key products over the upcoming periods. It utilizes sales trends, purchase orders, and current stock data to anticipate inventory needs and highlight potential inventory gaps or surpluses.

Product Inventory Forecast Summary

Product Name	SKU	Current Stock	Forecasted Demand (Next Month)	Lead Time (Days)	Incoming Orders	Expected Stock End of Period	Reorder Recommendation
Wireless Mouse	WM-2001	320	400	21	250	170	Yes
Bluetooth Keyboard	BK-1105	210	180	16	100	130	No
Webcam HD	WC-3300	75	160	30	80	-5	Yes

Key Assumptions

- Forecasted demand is based on average sales for the last 12 months, adjusted for seasonality.
- Lead times are based on supplier data as of the last purchase order.
- Incoming orders reference all purchase orders confirmed as of the document date.

Important Notes:

- Accuracy of forecasts depends on up-to-date sales and inventory data.
- Unexpected supply chain delays may affect fulfillment and projected inventory.
- Reorder recommendations should be reviewed alongside current supplier terms and stockout risk.
- Frequent reviews are recommended for high-turnover products or during periods of market volatility.
