```

Important Notes:

- UN/EDIFACT INVOIC is a global standard for electronic invoice data exchange.
- Each segment has a specific identifier (e.g., UNH, BGM, DTM) and separates elements with +, sub-elements with ::.
- Message is delimited by the apostrophe ' character.
- Legal and fiscal requirements may require localization of the message structure and content.
- Adherence to partner implementation guides is essential to ensure successful automated processing.
