

User Guide: Limited Liability Statement

1. Introduction

This document provides a sample format for a Limited Liability Statement, typically included in user guides, manuals, or documentation to inform users about the limits of the organization's responsibility regarding the use of its product or service.

2. Limited Liability Statement Sample

DISCLAIMER AND LIMITATION OF LIABILITY

The information contained in this user guide is provided "as is" without warranty of any kind, either express or implied, including but not limited to the implied warranties of merchantability, fitness for a particular purpose, or non-infringement.

In no event shall [Company Name], its employees, or affiliates be liable for any direct, indirect, incidental, special, consequential, or punitive damages, including without limitation, loss of use, data, or profits, arising from or in connection with the use or performance of this user guide, even if [Company Name] has been advised of the possibility of such damages.

[Company Name] does not warrant or make any representations regarding the use, validity, accuracy, or reliability of this guide or the results of the use of the information contained herein. The entire risk arising out of the use of this user guide remains with the user.

[Company Name] reserves the right to revise this document or make changes to the product described herein at any time without notice.

3. Important Notes

- This sample format should be customized with the actual company name and particulars relevant to your product or service.
- Limited liability statements help protect organizations from legal claims related to the use or misuse of their documentation or products.
- Such statements do *not* absolve responsibility in all legal jurisdictions; seek legal counsel for compliance and adequacy.
- It is recommended to review and update the statement regularly to reflect changes in product, service, or applicable legal requirements.
- Placing this statement prominently in all user documents is a best practice for risk mitigation.
