

Minimal JSON Invoice Data Structure

```
{
  "invoice_number": "INV-2024-001",
  "date": "2024-06-15",
  "due_date": "2024-07-01",
  "seller": {
    "name": "Acme Corp.",
    "address": "123 Main St, Metropolis",
    "tax_id": "TAX123456"
  },
  "buyer": {
    "name": "John Doe",
    "address": "456 Elm Rd, Gotham",
    "tax_id": "TAX654321"
  },
  "items": [
    {
      "description": "Web Design Services",
      "quantity": 1,
      "unit_price": 800,
      "total": 800
    },
    {
      "description": "Hosting (12 months)",
      "quantity": 1,
      "unit_price": 120,
      "total": 120
    }
  ],
  "subtotal": 920,
  "tax": 92,
  "total": 1012,
  "currency": "USD"
}
```

Important Notes

- Essential fields should not be omitted (seller, buyer, items, totals).
- Extend structure as needed for business requirements (payment terms, discounts, notes, etc.).
- Date fields should use ISO 8601 format (YYYY-MM-DD).
- Numeric values like quantity, unit_price, and total should use consistent decimal notation.
- Keys and field names should be kept in lower_case_with_underscores for clarity.
