

EDI 894 Delivery/Return Base Record Format

Sample Data Record Layout

Segment	Element	Description	Example
ST	ST01	Transaction Set Identifier Code	894
ST	ST02	Transaction Set Control Number	0001
BGN	BGN01	Transaction Set Purpose Code	00
BGN	BGN02	Reference Identification	123456
BGN	BGN03	Date	20240610
N1	N101	Entity Identifier Code	SU
N1	N102	Name (Supplier/Return Party Name)	ABC Supply Inc.
N3	N301	Address Information	500 Main Street
N4	N401	City Name	Denver
N4	N402	State/Province Code	CO
N4	N403	Postal Code	80216
LIN	LIN01	Assigned Identification	1
LIN	LIN02	Product/Service ID Qualifier	VN
LIN	LIN03	Product/Service ID	12345
QTY	QTY01	Quantity Qualifier	01
QTY	QTY02	Quantity	100
DTM	DTM01	Date/Time Qualifier	011
DTM	DTM02	Date	20240613
SE	SE01	Number of Included Segments	11
SE	SE02	Transaction Set Control Number	0001

Example Record (Simplified):

ST*894*0001~
BGN*00*123456*20240610~
N1*SU*ABC Supply Inc.~
N3*500 Main Street~
N4*Denver*CO*80216~
LIN*1*VN*12345~
QTY*01*100~
DTM*011*20240613~
SE*11*0001~

Important Notes:

- EDI 894 is primarily used for Delivery/Return Base Records between trading partners.
- Each segment serves a particular purpose (e.g., BGN for the transaction header, LIN for line items).
- Date format is typically CCYYMMDD.
- Both delivery and return scenarios can be communicated with this transaction set.

- Accurate product identifiers and quantities are crucial for proper fulfillment or returns.
