## Important Notes (UBL 2.3 Standard Invoice):

- UBL (Universal Business Language) enables electronic invoicing interoperability.
- This format supports digital processing, validation, and integration with financial systems.
- Mandatory fields include supplier and customer details, invoice number, and line items.
- Supports multi-currency, tax, payment terms, and compliance with legal regulations.
- It can be exchanged in XML format for automated B2B and B2G e-invoicing.
