Optimized JPEG Document Specifications for Invoices

1. Document Overview

This document defines the recommended formatting guidelines and technical specifications for generating and submitting invoice documents in JPEG format, ensuring file efficiency, clarity, and broad compatibility.

2. JPEG File Specifications

Parameter	Specification
File Format	JPEG (.jpg, .jpeg)
Color Model	RGB
Resolution	150â€"300 DPI (recommended: 300 DPI)
Dimensions	Minimum: 1240 x 1753 px (A4 at 150â€¯DPI)
Compression Quality	80â€"90%, balance size and quality
File Size	< 2 MB per page, if possible

3. Recommended Content Layout

- Header with invoice title, company name, and logo (if applicable)
- Invoice number and date, client information
- Clear itemized table for products or services
- Total amounts (subtotal, tax, grand total) clearly visible
- Footer with payment details and contact information

4. Important Notes

Please consider the following when preparing your JPEG invoice documents:

- Avoid introducing artifacts by compressing the JPEG file multiple times.
- Ensure all text remains legible and not pixelated after export.
- Do not include sensitive personal data unless essential for billing.
- JPEGs are not ideal for editable archives; keep a lossless version (PDF or original) for your records.
- Check that the full invoice is visible and not cropped after image export.
