Prepared by: Finance Department

EBIT Calculation Table

Description	Amount (USD)
Total Revenues	500,000
Cost of Goods Sold (COGS)	220,000
Gross Profit	280,000
Operating Expenses	120,000
Depreciation & Amortization	30,000
EBIT (Earnings Before Interest and Taxes)	130,000

Summary

For the first quarter of 2024, XYZ Corporation reported an EBIT of **USD 130,000**. This figure reflects the company's profitability from core business operations before considering interest and tax expenses.

Important Notes:

- EBIT excludes the effects of financing (interest expense) and taxes, focusing solely on operational efficiency.
- This report utilizes accrual accounting principles, including non-cash expenses such as depreciation and amortization.
- EBIT is a key indicator for comparing operating performance across companies and industries.
- This document is for internal management use and financial analysis purposes only.
