	Total	\$300,000	\$204,000	\$96,000	32%

Important Notes:

- Profit margin percentages are calculated as $(\text{Gross Profit} / \text{Total Revenue}) \times 100$.
- Ensure all departmental revenues and expenses are accurately recorded for reliable results.
- This breakdown helps identify strengths and weaknesses across departments.
- Regular review of departmental profit margins supports strategic decision-making.
- All financial data in this template are for sample purposes only.
