<b>Total</b>	<b>380,000</b>	<b>278,000</b>	<b>102,000</b>	<b>26.84%</b>

## Important Notes:

- This report presents gross profit figures per product category for the specified period.
- Gross Profit Margin is calculated as Gross Profit divided by Total Sales (%) for each category.
- All values are based on recorded sales and cost of goods in the accounting system.
- Does not include indirect expenses, taxes, or other overheads.
- Review carefully for data completeness and accuracy before making business decisions.
